

GetFTR: Closing the gap between discovery and access

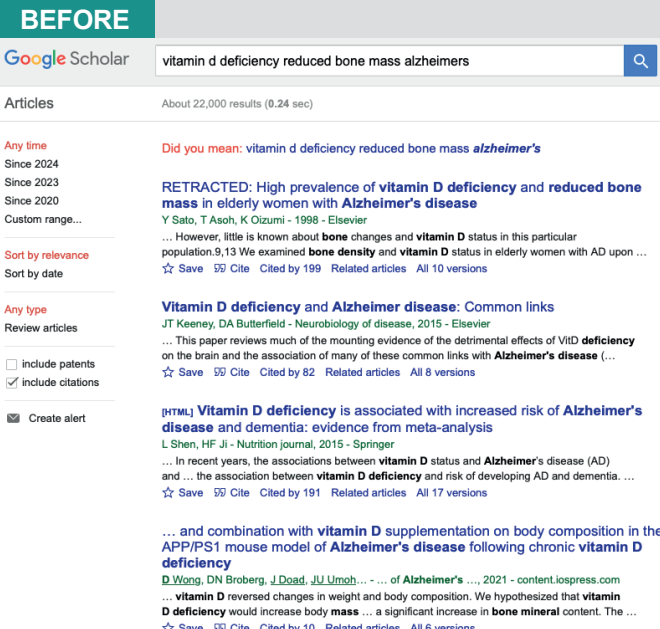

When you see the GetFTR indicator  in the course of your research, you can be confident you will get fast access to the most reliable, up-to-date version of the academic content you are entitled to read (including subscription, open access and free).

How Does it Work?

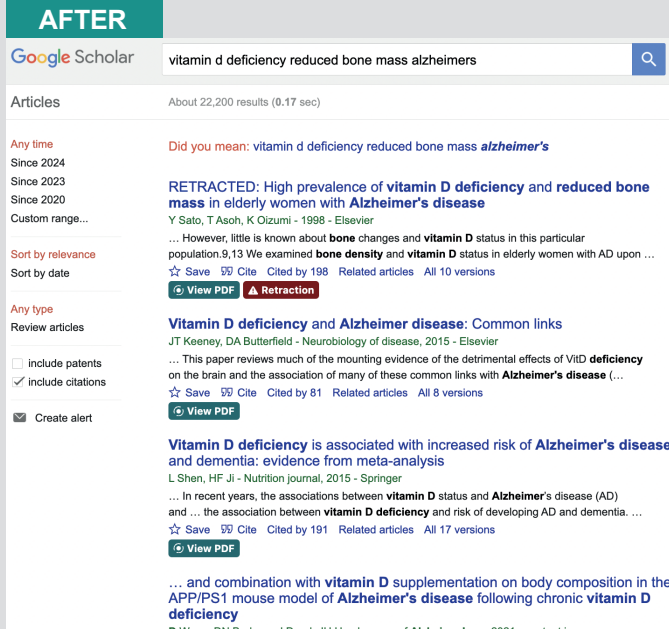

- Many research platforms—like Mendeley, Dimensions, ResearcherApp, APA PsycInfo, and SciFinder—already integrate with GetFTR, so you're benefiting without any extra effort!
- The free GetFTR Browser Extension expands this functionality to all websites that use DOIs. It also supports leading preprint platforms, linking researchers from preprints to the published Version of Record. The extension highlights content you have access to and flags retracted or updated articles, ensuring your research is accurate and up to date.

GetFTR: Fast, Reliable Access to Trusted Content
